

Millbrook Village Hall

Environment and Energy Policy

April 2018

Policy Statement

Millbrook Village Hall Management Committee recognises the impact that the hall has on the environment through its routine activities, its building management and through its influence and effects on the wider community.

We affirm our commitment to the protection of the environment at all levels and also acknowledge our responsibility to support that. We will support initiatives associated with Millbrook Parish Council's declaration of a Climate Emergency

We will fully comply with environmental legislation and will:

1. Promote environmental management policies and practices at every level e.g. heat efficiency, solar panels, water saving, eco detergents, LED replacement light bulbs.
2. Increase awareness of environmental responsibilities among hall users.
3. Minimise waste and pollution and develop and operate environmentally sound waste management procedures.
4. Reduce consumption of fossil fuels and incorporate long-term strategies for energy efficiency within planning and development.
5. Promote a purchasing policy which will give preference, as far as is practicable, to those products which cause least harm to the environment.
6. Avoid, wherever practicable, the use of environmentally damaging substances, materials and processes.
7. Maintain the village hall building and surrounding area in an environmentally sensitive way, having regard to local wildlife and the preservation of biological diversity.

Adopted on behalf of Millbrook Village Hall Management Committee

Name: Clare Watkins

Position: Chair
